

BauWatch

The small tower
with huge
surveillance capability,
without any need
for power!

Cube Solar

→ bauwatch.co.uk

The cheaper alternative for small scale projects, which doesn't harm the environment

No disruptions to your progress

Interruptions on construction sites can potentially hinder the development of your project. You don't want to be facing delays due to crime or find yourself unable to install CCTV because of a lack of power. These issues cause major setbacks in your plans and could even stop production. Here at BauWatch, we provide effective solutions which overcome any hurdle you may face.

What can the Cube Solar do for you?

Our Cube Solar may be half the size of our Solar Tower, but it provides double the efficiency. The combination of solar panels and a fuel cell mean that your site can receive 24/7 surveillance to ensure tight security without the need for a power source. This means that even through the winter, our Cube Solar can provide you its excellent service, whilst being CO₂ neutral. It is able to run for a whole year

without the need for regular servicing or checks, leaving your site undisturbed.

The BauWatch Cube Solar is ideal for:

- Small scale projects with no power
- Environmentally friendly projects

ADVANTAGES

Why BauWatch Cube Solar?

- ✓ CO₂ neutral due to a combination of solar panels and a fuel cell
- ✓ Can work during winter without the need for power
- ✓ Operates without regular checks leaving you to focus on your site progress

TECHNICAL SPECIFICATIONS

BauWatch Cube Solar
