# Secure your indoor space efficiently with the BauWatch Flex

## Discreet detection wherever you need it

If you're responsible for an empty building, a renovation project or warehouse security, then you'll need a security system that is specifically aimed at one or more indoor spaces. One that easily moves with you as your work progresses. And that is connected to a central control room that is alert 24/7 giving you a constant view on any likely threat by theft or vandalism.

## Effective security for indoor spaces

The BauWatch Flex gives you optimal surveillance for your building. The wireless and highly flexible system consists of a central unit to which several unobtrusive motion detectors with built-in cameras are linked. These are simple to mount, even in difficult places. Every space can therefore be secured with discretion. Thanks to the link with our 24/7 emergency room, timely intervention is

guaranteed. This not only saves you unnecessary delays, but also high costs and a lot of frustration.

## The BauWatch Flex is ideal for:

- Effective protection of indoor spaces

### ADVANTAGES

#### Why BauWatch Flex?

- ✓ Works for up to 4 years on 1 set of batteries, no power connection required
- ✓ Flexible, can be mounted in the most difficult places
- ✓ Can be placed inconspicuously wherever you want
