

BauWatch

The UK & Europe's
leading provider of
temporary CCTV

→ bauwatch.com

Why BauWatch?

We deter more criminals from construction sites than anyone else across Europe.

Our UK control centre monitors your site 24 hours a day

Our industry-leading products were designed specifically to secure construction sites

Access to a livestream of your camera footage through our online app myBauWatch

Flexible weekly contracts to put you in control

Effortless service

Free site assessment

A member of our team will visit your site and create an individual security concept - free of charge and without obligation.

Ultra-fast installation

After a contract is signed, our average installation time is only 48 hours.

Highly trained delivery team

We can set up and remove the system quietly, with no impact to your project.

One point of contact

BauWatch operates entirely in-house, without subcontractors or service providers, meaning we are your one point of contact for all enquiries.

We never switch off

The BauWatch team is available 24 hours a day.

BauWatch Greenlight: Ideal for securing building sites, real estate, and empty sites. Provides 24/7 video monitoring with 100m detection range and HD image quality. Includes a speaker and myBauWatch feature.

BauWatch Solar: Ideal for construction sites with no electricity, infrastructure projects, wind and solar farms, and large construction sites. Provides 24/7 monitoring with 100m detection range and HD image quality. Includes a speaker and myBauWatch feature.

BauWatch Solar Thermal: Ideal for autonomous 24/7 monitoring for larger sites. Provides 24/7 monitoring with 400m detection range and HD image quality. Includes a speaker and myBauWatch feature.

Our CCTV towers are a physical deterrent, meaning in most cases they prevent criminals from entering your site before any crime even takes place.

The systems incorporate HD cameras and a loudspeaker to directly communicate with intruders and tell them they are being watched. Additionally, the high- tech sensors inside the monitoring towers detect manipulation attempts or vandalism, and report them to the control centre.

BauWatch Brighteyez: Ideal for hidden corners, outdoor surveillance, and complementing our CCTV towers. Provides 8 cameras per bridge with 30m detection range and HD image quality. Includes remote arming/disarming and rechargeable batteries.

BauWatch Flex: Ideal for indoor surveillance. Provides 6-10 cameras with 10m detection range and 320 × 240px image quality. Includes remote arming/disarming and rechargeable batteries.

We can also provide additional services such as concrete blocks, access control and manned guarding on request.

How do we protect your site?

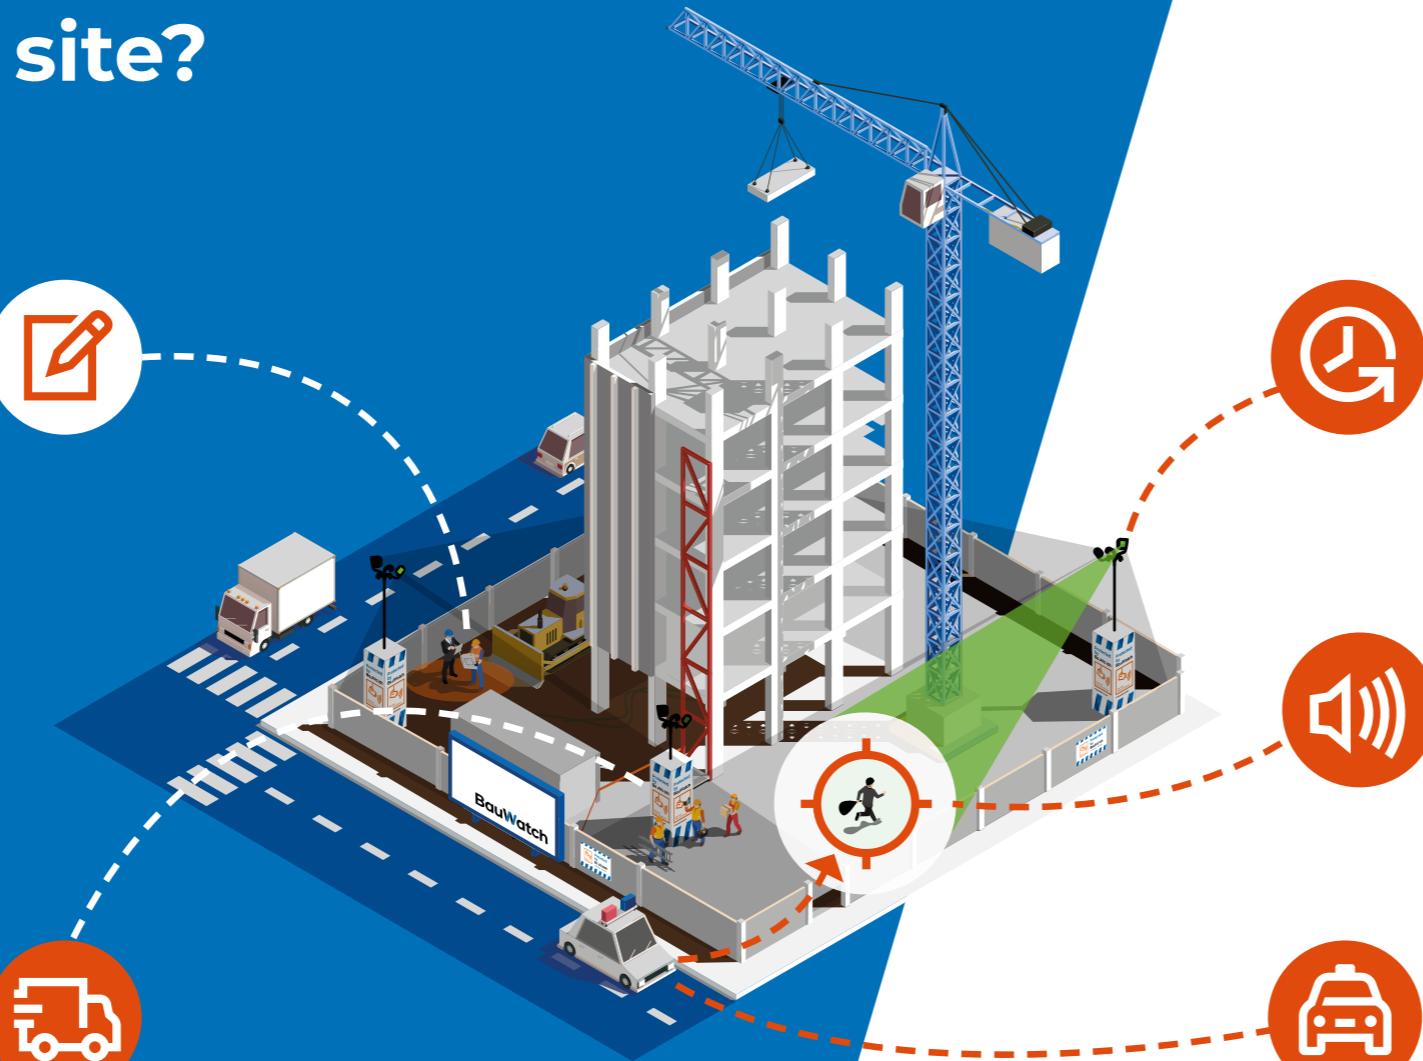

1 Free site assessment

Before we set up your surveillance systems, we personally visit your project and create a security concept tailored to fit you and your requirements.

2 Install

We install your chosen industry leading products within 48 hours. Your site is then monitored 24/7 by our UK-based in-house ARC.

3 24/7 Monitoring & Recording

Our world-class control centre monitors your site around the clock. You are also given access to our platform 'myBauWatch' to view a live feed of what your camera sees, for your own peace of mind.

4 Response

In the event a break-in is attempted, we are alerted in real time. The perpetrator is addressed by our highly trained staff via the tower loudspeaker. At the same time, your chosen security service are informed.

5 Follow-up

The BauWatch control centre provides detailed information of the event to both the chosen security service and the customer site contact, and you can easily receive footage of the offence.

Our world-class security team

Our world-class monitoring station is entirely in-house, meaning you can expect exceptional surveillance and intruder response for your site. We watch over your site whenever you aren't there, targeting any security breach and reacting in real-time to the situation. When our towers detect movement, our highly trained team responds within seconds using our Tower's 110db speaker system to audibly challenge the intruder whilst simultaneously calling your chosen security service to resolve the problem in person.

If any issue arises onsite, you'll be able to request a recording from any of our cameras you have installed. Just ask for a date and time and our team will be able to send you a digital recording.

Live view of your site with myBauWatch app

In addition to this, a live feed of your tower footage can be viewed at any time through our online app myBauWatch, meaning you can keep an eye on what is happening at site 24/7, no matter where you are. myBauWatch gives you all the information collected by our security systems at the push of a button.

You have the ability to adapt monitoring times to suit your schedule, see a history of any activations picked up by our cameras and view a real-time stream of what's going on at your site. Through your phone, tablet or laptop, you have access to information concerning all of your sites, ensuring that you are always informed and giving you that further peace of mind when it comes to your site security.

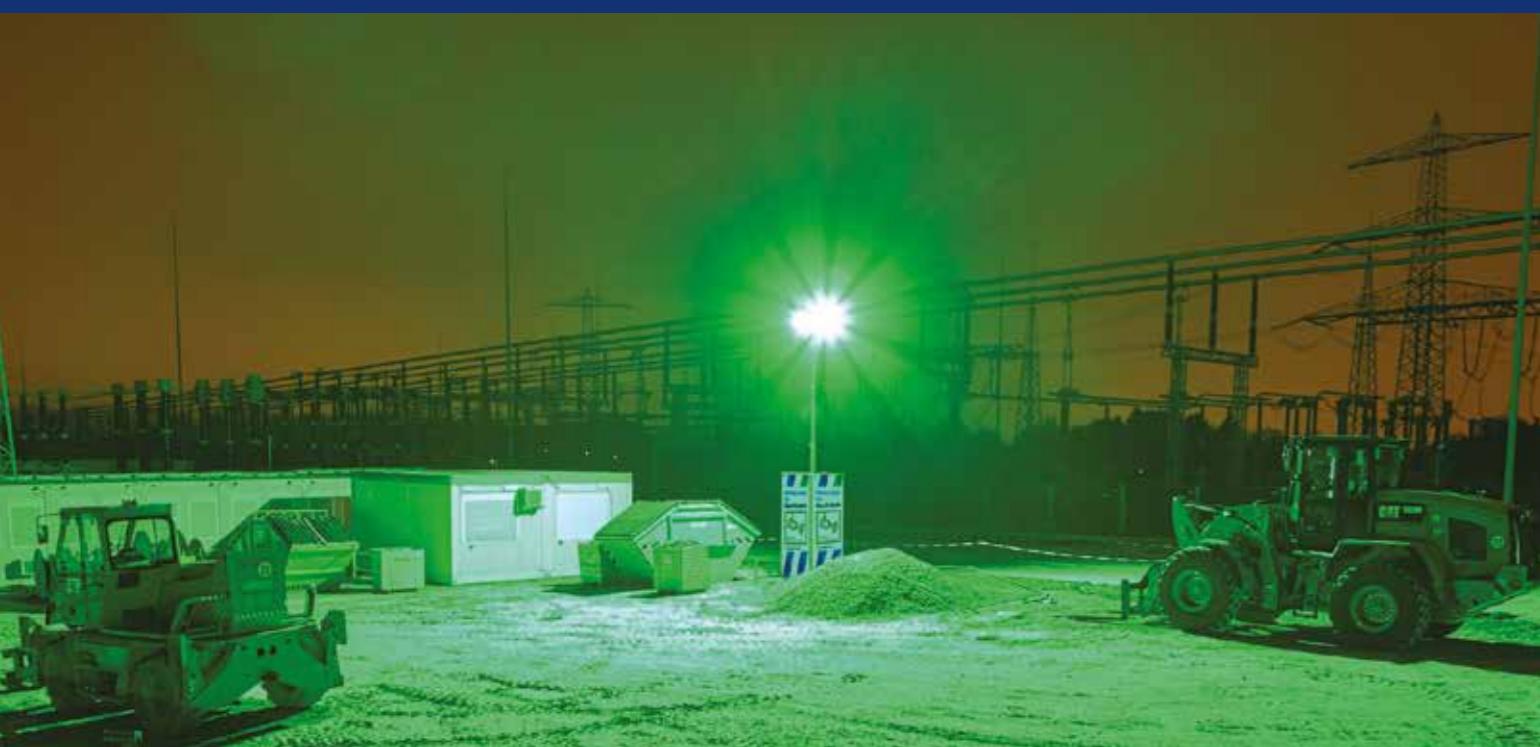

Who is BauWatch?

We were founded in 2008 by the Dutch company 'Visser Assen', due to the lack of security options for building sites in the Netherlands.

When our products were being designed, all features were included to specifically meet the requirements of the construction industry. Over time the products have developed into what are now known as our BauWatch towers, we proudly created this product category and now set the standard for the industry.

Following exponential growth in the Netherlands and Germany, and with significant investment from our parent company Haniel, BauWatch came to the UK in March 2021. We can now deliver our leading products nationwide with 15 years of security experience behind us as a company. We are the creators, and Europe's leading supplier of CCTV towers, and we have plans to expand even further in the coming years.

Our achievements in 2022:

76,000 evictions

1650 arrests

7000 active systems
across Europe

21 million alarms
