The BauWatch Scout – easily deployable, solar powered security system

Protect your valuables with confidence

The BauWatch Scout is your go-to solution for securing your site or property. With cutting-edge 360° motion detection and video verification, rest assured that your assets are protected with precision. Instant alarms are seamlessly transmitted to our control center, and the built-in LED light system serves as a visible deterrent, sending a clear message to potential intruders. The BauWatch Scout has app support, allowing for easy security management.

Solar-powered efficiency

Embrace sustainability with the BauWatch Scout's solar-powered capabilities, optimising your security solutions while reducing environmental impact. Harness the power of the sun to keep your security system operational while reducing environmental impact. The Scout's modular design allows effortless relocation, making it the perfect companion for environments that demand adaptability.

The BauWatch Scout is ideal for:

- Construction site security
- Real estate and vacant property
- Sites with limited space
- Part of a more comprehensive security solution

ADVANTAGES

Why BauWatch Scout?

- ✓ Solar-Power efficiency
- ✓ Rapid deployment through the modular design
- ✓ Visible deterrence, because of the integrated LED-light
- ✓ Effortless relocation
